

Requirements for “Initial Report”

Deadline - Thursday Week 4 at 5.00pm(*)
SENG3011

Every team must hand in a report containing the following sections:

Team Web page URL

You must provide a URL which will correspond to your team's software releases throughout the workshop.

Initial Design

1. Describe how you intend to develop the module and provide the ability to run it in standalone mode
2. Discuss your current thinking about how a third party software system can invoke your module and interact with it.
3. Use a diagram showing the overall software architecture for (1) and (2) above
4. Present and justify implementation language and environment that will be used.

Initial Project Plan

Provide a project plan showing team member responsibilities, work arrangements and any information team members will be using to coordinate their activities. You should also mention any software tools used by the team to assist project management.

The report is meant to be a working document so some information will be incomplete at this stage. 4-5 pages should be enough.

Each group must submit the report Thursday Week 4 at 5pm(*). The report must be packaged under one file called report1.zip (max size 4Mb) and submitted via WebCMS.

(*)The deadline that is shown on WebCMS will be later than the official one, you need to ignore it
